

LEGO CHALLENGE CARDS in Spanish

- These LEGO challenge cards in Spanish give kids a fun, hands-on way to engage with the language. You can download the cards at the end of the post.
- LEGO challenge cards encourage children to think creatively to complete a building task. LEGO challenge cards in Spanish use the task to reinforce common vocabulary. Some of the challenges involve making an animal or object: *Construye un sol* or *Haz una serpiente*.
- Other challenges reinforce basic concepts such as colors, numbers and shapes. To understand the task, kids use reading skills, or listening skills when reading them on their own aloud.
- The LEGO challenge cards in Spanish are excellent reading practice. For this reason, the numbers on the cards are written out as words. On one set of cards, the content is supported by an image, making it easier to understand the task. There is also a set of cards with no images for kids who have more vocabulary and are reading at a higher level.
- There are several blank cards on the PDF. Encourage kids to think of other challenges and help them express them in Spanish. Use the sentences on the cards in the set as sentence frames for new cards. For example, children can complete *Construye un/una ...* in countless ways. They can also change the number of colors in a task or the number of bricks.
